

ADDENDUM NO. 1

to the

PROJECT MANUAL & PROJECT PLANS

for the

VILLAGE OF HAMILTON DEPARTMENT OF PUBLIC WORKS VEHICLE MAINTENANCE GARAGE – PHASE 2

dated

July 27, 2015

Your attention is directed to the following interpretations of changes in and additions to the Contract Documents for the DPW Vehicle Maintenance Garage Phase 2 Project for the Village of Hamilton.

Please indicate receipt of this addendum (including date) on page 16 of the Project Manual.

The following clarifications of the contract documents are based on Bidder's Questions:

1. The accepted manufacturers listed under technical specification Section 13121 – Pre-engineered building provide a “level of standard” for the type of building the Owner will accept. Other manufactures will be considered provided that meet or exceed the “level of standard”.
2. The contractor will be responsible to furnish and install all doors (interior, exterior, garage, etc.) and windows.
3. The contractor shall frame up all interior walls. Framing shall include horizontal blocking as required for the installation of the interior liner panels. In addition, Contractor is responsible for furnishing interior liner panels for all interior walls. Owner will install panels on interior walls.
4. Owner will be responsible for removal of the existing structure including foundations. All excavated areas will be backfilled with suitable material.
5. Owner will be responsible for furnishing in installing “Village of Hamilton DPW” sign on exterior of building.
6. Contractor shall furnish and install concrete bollards on each side of overhead doors (10 total).

END OF ADDENDUM NO. 1
